COMMUNITY HEALTH CENTER FQHC QUALITY

COVID-19 CPCI Mapping Deep Dive

Part 3: Registries for COVID & Post-COVID Care Management

May 7th, 2020

This is a NYS Health Center Controlled network (NYS-HCCN) Activity
A HRSA Funded Project of the Community Healthcare Association of New York State
HCCN Grant Number: H2QCS30278

Agenda

- Welcome & Guidelines
- COVID-19 Registries
- Build Your Registries 101
- Health Center Experience
- Q&A
- Evaluations & Announcements

Zoom Workgroup Guidelines

- Phones have been muted to prevent background noise.
- Please use the chat box to type questions during the meeting. Everyone will also have the opportunity to ask questions during the Q&A.
- This webinar is being recorded.

Infectious Disease - COVID 19 Complication Risk

Created By: Azara
Created On: 3/21/2020 6:35:57 PM

Modified By: Azara
Modified On: 3/21/2020 6:35:57 PM

The Infectious Disease – COVID-19 Complication Risk registry provides a method to identify patients of all ages who are considered at risk for Coronavirus Disease 2019 (COVID-19) as identified by the CDC (see reference below). The registry lists each patient's most recent related diagnosis or medication record, demographics, next appointment and most recent encounter (including telehealth).

Inclusion Criteria: Patients with an active diagnosis of COPD, moderate or severe asthma, congestive heart failure, severe obesity, diabetes with complications, cirrhosis, kidney failure, or stage 3 HIV, or are currently pregnant, or are taking medicines such as cancer treatment that suppress immunity who have had a medical encounter (or pending appointment) during the specified reporting period.

All data shown will be the most recent values and dates collected, unless otherwise noted.

Infectious Disease - COVID 19 Testing

Created By: Azara
Created On: 3/21/2020 6:35:58 PM

Modified By: Azara
Modified On: 3/21/2020 6:35:58 PM

The Infectious Disease – COVID-19 Testing registry provides a method to evaluate and monitor patients of all ages who have been tested for Coronavirus Disease 2019 (COVID-19). The registry lists each patient's most recent testing dates, coded symptoms, demographics, next appointment and most recent encounter (including telehealth).

Inclusion Criteria: Patients with a lab result of a COV-19 test who have had a medical encounter (or pending appointment) during the specified reporting period. All data shown will be the most recent values and dates collected, unless otherwise noted.

Notes:

- Contact Azara Support if you have new labs for COVID testing that are not appearing in the registry. Review the Value Set Tab to see tests included.

Health Center Experience

- **Acacia Network**
  - **David Collymore**, MD, Chief Medical Officer
  - **Lauren Mendenhall**, VP of Quality Assurance
  - **Jackeline Figueroa**, Senior Quality Improvement Coordinator

Acacia's Quality Improvement department is using Azara's COVID Complication Risk registry to help identify patients with an active chronic disease such as COPD, asthma, or diabetes. These patients are our most vulnerable and in need for immediate outreach and care management.

This COVID campaign is one of many that are currently underway to ensure Acacia's patients continue to receive high quality care.

We are also actively converting these patients into Telehealth visits and continuously monitoring their health outcomes.
