- Services provided
- Clinical processes
- Health outcomes
- Patients' use of services
- Staffing
- Costs and revenues

HRSA

Health center level data is collected and sent to HRSA.

## UDS+

UDS+ is the electronic submission of de-identified patient-level data using Fast Healthcare Interoperability Resources (FHIR) with the goals of:

- Reducing Reporting Burden
- Better Measuring Impact
- Promoting Transparency

HRSA

Patient level data is sent to HRSA.

# What is UDS Patient Level Submission (UDS+)?

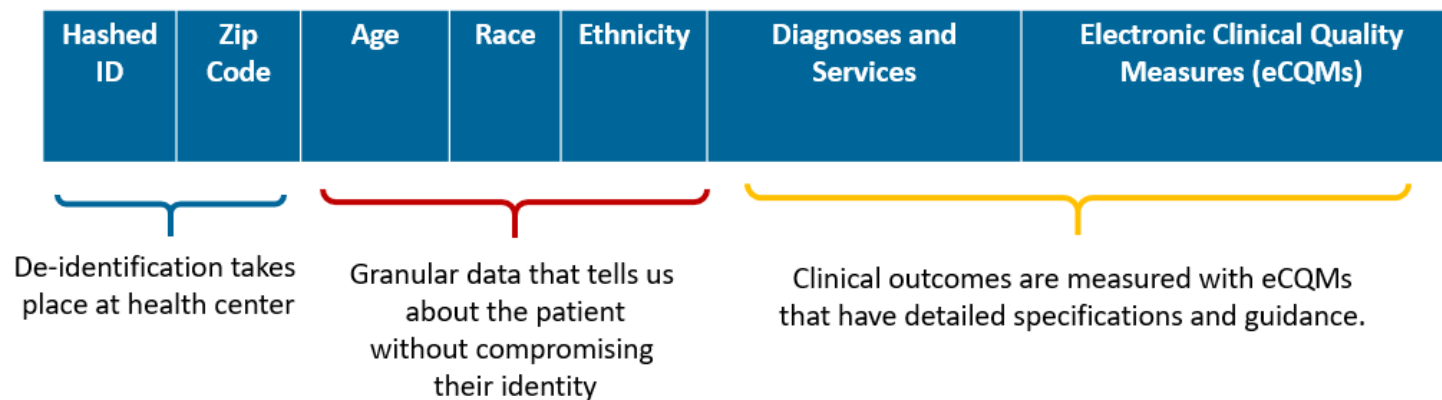

UDS+ is...

- Beginning with CY 2023 UDS (data submitted in 2024), BPHC will accept patient-level report data.
  - UDS Tables Patients by ZIP Code, 3A, 3B, 4, 6A, 6B, and 7
- Submitted **electronically** via Fast Healthcare Interoperability Resources (FHIR)

UDS+ does not...

- Collect full copies of data directly from patients' electronic medical records.
- Collect patient identifiers.

For more information, visit: [Uniform Data System \(UDS\) Modernization Initiative](#)

# Benefits of patient-level data collection
